Well.. I have never been in this particular area before, but it was suggested that perhaps I should place a post here.

Friday am, at 0045, 27 Jan,1995 I was flying my aircraft from Orlando, Fl to Sarasota, FL. I had one passenger in the back asleep, and on riding the right seat awake. I was approx 30 nauticle miles out of Sarasota, inbound on the 220 radial.. I was at 3000' the night was clear, no clouds, unlimited visability. My ADF (low Freq) radio began "pulsing" the squelch circuit.. instead of the ordinary "rushing" sound, it began a pulsing "quieting" routine. I didn;t pay too much attention to it. Shortly after that, my aircraft experienced a buffeting. I immediately looked down at the engine gauges on the instrument panel. As soon as I looked down, the cockpit was brilliantly lit up with a greenish/white light. I looked up, and out of my 11 o'clock I saw an orangish/red object, roundish, but longer than it was wide, maybe 1/4 mile away, and appeared about the size of a semi trailer. Appx. 50' in length. This object had twin trails, merging into one distinct trail extending about 1/2 mile behind the object at all times. The object crossed my flight path, descending rapidly. My 1st impression was the flaiming fuselage of an airplane crashing into Sarasota.... This object leveled out perfectly without an arc... lust went from a rapid descent to straight and level!!! It leveled off before reaching the city limits, proceeded across Sarasota, out over Sarasota Bay and then just was gone! Like it just shut itself off!! I immediately radioed Tampa Approach Control and reported what I had seen.. I tracked the object for about 5 seconds or so. Tampa Approach had NOTHING on Radar.. NOTHING! Something THAT big and they didn't even see it..   I was a bit shaken, even did a circle out over the bay wondering if I would spot anything.. My awake passenger saw the flash as it went by us.. a few expletives were stated at the time.. it was close!! Anyhow.. I telephone Tampa Approach via telephone later that day, got the Supervisor.. he helped me place the time at 12:45am.. I am currently attempting to secure a copy of the Air Traffic Control tapes from that morning. I was asked by the Supervisor to contact MUFON, which I did.. have received telephone calls from the State Director, and was interviewed this afternoon. That's

basically where I got the idea to bring it to the Internet..
and to check out this Newsgroup. Also am hoping maybe someone
else may have seen or talked to someone who saw something Early
Friday morning..
I am NOT saying I saw a spacecraft, or anything like that.. I
am saying, after being in the Military, and having an extensive
background with weapons and the like, I have NEVER, EVER seen
anything even close to that! And it was not "Falling" as it
instantly changed attitude from descent to straight and level..
this object was on a due East to West corse... It was NOT an
aircraft, rocket, meteor, etc..   It "flew" like nothing I have
seen, and defied the natural rules of flight and aerodynamics
that I, or any other pilot know of! Think what you will.. I
know I have never seen anything remotely close to this.. I will
continue to say "I have no idea what that was!" I do know that
it affected my aircraft BEFORE it passed in front of me.. and
when it did pass in front of my aircraft, it produced NO WAKE
TURBULENCE??!!! That bothered me even more, after I thought
about it..

Well.. so you know.. that's about it for me.. If anyone in
the area honestly saw, or knows of someone else who saw
something that morning, I would greatly appreciate a response
here..

Thanks..

Last night I saw an unusual but explainable bright light in the sky. About 10:45 PM, I was returning to my home from walking my dog when I noticed a noctilucent cloud (one which is illuminated by sunlight after dark because of its extreme altitude). The cloud was not unusual but was interesting to look at. After a few minutes, a pin point of yellow light in the middle of the cloud became brighter and brighter until it was about half as bright as our street lights which are the same yellow color. I watched the light for 30 sec. to 60 sec. until it dimmed the same as it had brightened. Then I watched the cloud until the sun finally set on it.

I would have dismissed this light as just the head light of an airplane which turned toward me for 30-60 sec. and then away. Even the unusual yellow color could have been from the atmosphere which causes our colored sunsets, setting moon, planets and stars.

However, tonight, I learned from the Honolulu news that yellow/orange lights had been observed in the skys over windward (east) Oahu for the last week. Many lights together were observed by many different people at different times and different locations. All descriptions were of yellow lights. Those who live on windward Oahu are accustomed to seeing the many aircraft (airliners and military) and I believe they would not have reported this unless it was very unusual.

The news report included an official statment by agents of Mufon that this was a hoax employing (bag & candle) hot air baloons. I can honestly tell you that what I saw was no hot air baloon. It looked more like the head light of a jumbo jet. It would seem to be quite a coinsidence that anomalous yellow lights are being seen to the east of Oahu and to the west of Hawaii (200 miles apart) at the same time and are not caused by the same phenomenon. It would also seem unlikely that the Oahu sightings were all airplanes flying directly at the observers simultaneously.

If Mufon is serious about their explanation, then I would seriously

question their objectivity. Maybe Mufon has an agenda for spreading mis/dis-information? Maybe they just jumped to a hasty and incorrect conclusion.

If anybody in the islands has had similar sightings, please post your story or e-mail me about it. I am really anxious to hear an explanation which fits ALL the sightings.

The U.K.magazine Flying Saucer Review usually contains some strange articles and the editor does have some crazy ideas about worldwide conspiracies , angels etc. etc. Occasionally though an interesting article appears and this was the case in the winter `94 issue. Although this is not a personal sighting I believe this post is justified here as it could be (if true) a very significant report.The writer,Barry Chamish is, allegedly, a distinguished writer, having contributed to The Boston Globe,Sunday Telegraph and New Statesman amongst others. In the FSR article he states that 1993 saw a UFO flap in Israel and goes on to give details of several sightings. A craft is said to have landed near Kadima on March 30th 1993. The next day it returned and metal shards were retrieved. Chamish says these were analysed by Tel Aviv University and found to be of unknown origin.A Dr.Fuhner, director of the biochemical department of the State of Israel Institute For Geology analysed a shard.

He reported "On Thursday27/5/93 we received a sample weighing 2.7 grams and submitted it for analysis. After putting it through two separate tests we have found the material to be composed of elemental silicon, a substance not found on this planet".

Apparently a number of people descended on Kadima and retrieved samples of this before the authorities could react.Thus ,the article claims, there are people in Israel who have in their possession samples of material which "were not manufactured by any

process known."
   This region of Israel has,for some reason, received a large number of UFO visitors according to Chamish.
   So there it is,make of it what you will!

The following report is from a new UFONet file and as I can't recall it having appeared on ParaNet, it is appended for your enjoyment. :)

FIVE WITNESSES OBSERVE STRANGE OBJECT

The following is my report of an investigation conducted by Norma J. Croda of Indianapolis.

Friday, September 9, 1994, 8:30pm. Racoon Lake, Parke County, IN (to the left of Indianapolis). Five witnesses observed a strange "parent object" approximately 8 miles west of Rt.231 on Rt.36.

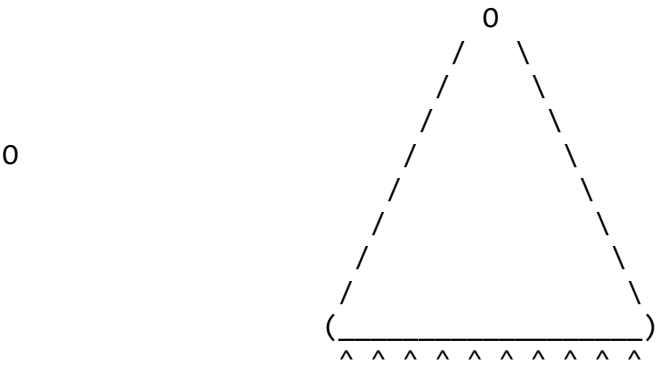
Eyelyn Easson received a call from Steve Buchanan telling her that beach-ball sized lime green balls of light had come out of the woods over near his employer's house (Dave) at about 8:30 PM.

Mrs. Easson: "Steve and Linda had seen the same lights on February 4th. My husband and I went to pick up Steve to go to Dave's and, just as I pulled into Buchanan's lane (about 9:20 PM) I noticed a strange light in the sky. Steve, Bill and I watched for about five minutes and Linda came out and watched with us. The object moved in a zig-zagged way a short distance. When we had been watching 15 minutes, Steve called Dave (who had been watching from his home and had made the initial sighting) and he came over and watched with us. Suddenly a white speck of light zoomed over us to our right going east to west and

hovered over the object. A light came up and (it) took it in. Then a second speck of light flew east to west over us, but to the left of us and went into the rounded edge of the object. About a half hour later the object spun around, green light now at top, red light at bottom. A speck of light came out of the right side as the object had spun around, and another from the bottom, It then zig-zagged to the right a short distance and the specks each flew back west. The object flared when we shined a spotlight at it. Other times (it) flared as well. Back light blinked a couple of times."

Bill Easson reported that his vision was not sharp enough to see the detail his wife had reported and drawn. He just saw a bright light several times brighter than any star, which exhibited several colors. The object had hovered for over two hours, but distinctly moved twice, once to the right, then once to the left.

The object did not "leave", but the Earth's rotation took it below the horizon. In sight approximately two and a half hours. Venus was in the southwest, nowhere in the vicinity of the strange object. During the next few nights the witnesses looked in the same area but never saw the strange object.



(Sept, 9, 1994, 8:30 PM, Racoon Lake, IN. Parke County), Robert Taylor

We hesitate labeling objects beyond the close encounter range, not necessarily because of the distance, but due to the usual lack of detail for identification purposes. However, in this case we don't have to worry about a witness with poor vision or a witness who stretched the facts or one who simply couldn't figure out what he/she was seeing due to ignorance. There were five adult witnesses, and the FI feels that these people simply reported what they saw.

The main object, possibly a "parent craft", and smaller objects, possible other craft or "probes", was observed for two and one-half hours. The main object moved a couple of times, but mostly hovered. The main object report passes the Natural Source Test. This was not a star, nor a planet, Venus was visible at the same time in the SW.

This report also passes the Man-made Source Test for the same reasons mentioned above. Blimps can hover, but the description and length of time observed rules this out. Everything has to move to stay in the air or, in the case of balloons, don't hover that long, nor do

they have lights of this type. Man-made fixed structures were ruled out. Hoax by witnesses was ruled out.

This report has been given the preliminary identification of UNKNOWN, Significant, because it was some kind of craft with other objects coming and going from it, main object observed over a long period of time. Berliner Strangeness scale: 02 (Night Object), Berliner Credibility Scale of 02 (Multiple Average Witnesses). Speiser Probability Scale P4 (Credible and sound).

Ten days later, on the 19th of September, there were two more sightings, both on the same day.

A security guard near Evansville reported a strange object, distant, but that stopped and reversed direction. This occurred at 2:58 AM and lasted about ninety seconds.

Then at Indianapolis the investigating FI who checked out the Racoon Lake sightings, along with her daughter, observed a strange object in the same general direction. The object appeared to be only about a mile away. The event started at 9:00 PM.

Norma Croda had gone outside to talk with some neighbors and noticed a bright light above a house, which was a half-block to the west. She saw a very bright red and green lights flashing, went inside to get binoculars and watched through the upstairs window. When focused in, the colored lights, red, green, and yellow, appeared in a band around the centre of the white light. The colored lights seemed to be rotating. Her daughter, who saw the object for only about ten minutes, took the binoculars and after 3-5 minutes said it was turning and moving. The light slowly moved to the NW. they tried to follow it in their car but lost it. Observation time: 45 minutes.

The next evening and subsequent evenings there was no similar object observed therefore this was not an astronomical object. The length of time observed by a trained observer also eliminates aircraft. The case is still under investigation.

Then, FIT Roger Sugden filed this preliminary report on Sept 20th: Approximately September 11th or 18th, near Fort Wayne, 9-10pm, four or more witnesses (one a state trooper) saw a strange object. Also reported was an extremely low F-16, little detail at press time. Under investigation. Mr.Sugden, a trainee, was advised to contact FI's Engstrom and Taylor.

It seems that on Saturday, Feb 4, 1995, a UFO was reported to have
been seen over Baton Rouge, LA. This is all I have on this at the
moment:

Subj: ufo near Baton Rouge? Section: Mutual UFO Network
To: JAMES SWINNY III, 71774,3031   Sunday, February 05, 1995 4:32:18
PM
~From: :Roger DiPaolo/SL, 73072,3312   #34094

>>Here it is...On Channel 2 Baton Rouge at there 10:00 news show
they reported that many people had called there station to report
a triangular shaped UFO hovering over the city.!!!!!!
Whats going on, are we under invasion, or what! Thats the second
sighting in less than 4 days!!!?//??????

Someone say something!!<<

On Friday, Feb. 10, 1995, UFOs were spotted over Houston, TX.
This is all I have on this at the moment:

Subj: Houston UFO's   Section: Mutual UFO Network
To: all   Saturday, February 11, 1995 8:49:26 AM
~From: Rich Ryznar, 70741,2673   #35238

The meteorologist on the late local news (ABC affiliate) last night said that there were a number of ufo's seen between 6:45 pm and 7:00 pm. Many views called the station, mostly from southern Houston. He explained this as either the fog rolling in from the Gulf of Mexico at the time that the sun is setting, or space aliens. This mornings news paper wasn't in the driveway, so I don't know if anything else has been said.

hey all.....just found this group and wanted to share an experience I had....

     I beleive it was last september sometime....about 8-9 P.M PST...I was unloading groceries from the car and noticed a bright pinpoint of light due west and about 30 degrees of the deck (90 being straight up)...I finished with the groceries and went back out to observe the light...it was pink/green twinkling and was very intense...I couldn't make out any mass to it as it seemed to be at least 30 clicks away...I lined myself up with a pole and a railing so as to judge movement...I stared for about 20 minutes and it hadn't moved or altered in intensity...overhead I noticed very faint traces of green darting through the thin clouds above....I went inside to do important teenager stuff and came back out to check on my little UFO, but alas all signs of it had vanished.....
     just for reference...I live in Virginia City Nevada...it's about 20 miles from Reno.....you want UFOs and external propulsion aircraft come to Nevada :)

Remember Roswell,

Summary from a daily dutch newspaper (De Telegraaf), 14 february 1995.

Almere sighting.

2 Woman are walking with their dogs in the evening at 19.40
hours. It is the 21th of November 1994. One of the ladies
said, "it was a sphere and it just looked like a sunset".
Dozens of people also from Amsterdam and Zeewolde witnessed
the same object. Most people thought it being the moon and
payed no attention to it. The OPUS (Onderzoek (= investigati-
on) Parapsychology, Ufos, Spiritual) foundation collected all
data and concluded this week that it was no blimp, constructi-
on work light or a ball lightning but a real ufo. That sphere
was seen above waters, trees and residential areas. It showed
remarkable behaviour. Initially it hoovered, moved from left
to right, and one family saw it spinning around before it shot
off into the air at high speed. The KNMI (Dutch meteorological
intitution) could not explain this sighting. Nor could a
foundation (De Koepel) in Utrecht which is also specialized in
ufo sightings. According specialists so many people watching
the same ufo is very rare.

Bliepings ...,

Originally posted by Doug Angel <udangel@mcl.uscb.edu>:

Before I state what I saw I would like to clarify that I am using UFO in
the very literal sense. I, and four of my friends saw something that we
cannot explain. Here's the story.
At about 11:00pm (pst) last night my friend called me over to his room.
His room looks out on the Channel Islands and is on the 7th floor, giving
it an excellent view. On the horizen I saw a line of lights. After
summoning two more friends and getting a pair of binoculars was able to
see it somewhat more clearly. The lights were arranged symmetrically
around the axis perpindicular to us. I will describe the lights as I saw
them from left to right. The first light was slightly above the others,
after a small space there was a a group of four lights close together in
a straight line, after another space was a single light, a larger space
separated it from a pair lights in the center, another equally large
space lead to another single light, a smaller space seperated this single

light from a another straight line of four lights, at the end was another light above the rest at the same level as the first.
Through the Binoculars it appeared that the object was actually curved. At this point we left the dorm and went down to the beach to get a better view. As we watched we noticed it moved from East to West (The Ocean in Santa Barbara is actually to the South so it was moving from our left to our right) at differing speeds. It would go very fast for a short time and then stop. At one point I saw it bob down and then resume moving. My friend saw it tilt along the perpindicular axis as well while looking through binoculars. We have no explaination for what it was.
It dissappeared behind one of the islands and did not reappear. The Islands are about 26 miles away and the thing appeared to be about an inch long from our perspective, for the distance then it must have been very large. This would rule out aircraft since 747's on approach into LA appear to be about an 1/8 of an inch and would be at roughly the same distance, if not closer. It also covered an incredible amout of space in a very short time, fastr than we have seen other ships travel. Therefore we are at a loss. We have speculate dthat it might have something to do with PT. Magu which is a Navy Training area S of here. If anyone has any ideas please post them because we cannot think of anything. Thanks.

~Lines: 16

Thursday evening, 2/2/95, at 10:30 pm, it was reported to Marin Online that two crescent shaped (boomerang or "V" shaped) UFOs were sighted above Ross Ca. The sighting was reported by an eye witness who stopped

his car and watched the objects from directly below them. They were traveling very slow (5mph) and were totally silent. They were holding a formation of one above the other, the lowest one being 1000 ft. in altitude and the other being directly above the other at approx 1500 ft. altitude. They gave off a slight green glow which remained in the area a short while after they had passed through. The person who reported this sighting is a private pilot who knows the difference between conventional aircraft and whatever these craft were. They were NOT helicopters and they were NOT aircraft of any type he has ever seen or heard of.

    If you have any further information on this sighting, or if you also witnessed this event, leave us all a message. That's what this conference is all about.

I just heard from a friend who lives in LA, about a possible late afternoon sighting in the Anaheim area. Here's all he could provide at the moment

"A funny thing popped up in a teaser for a local newscast, I think it was during X-files (I was half asleep) so that makes it the local Fox affiliate. Anyway, back to the teaser, the short blurb mentioned a ufo being sighted in the clouds over Anaheim by a retired aerospace engineer. They started to show his sketch of just what he'd seen, when they cut away and gave the usual 'details at 11:00' type statement, and cut back to commercials. I tried to stay awake for the newscast, but of course it was that little teaser that they always hold until the very last segment. By then, I'd lost the battle. From what I could see in the teaser, the time appeared to be late afternoon/evening..."

Anyone out there able to provide any more information?

There was a mass sighting in the Los Angeles area on Thursday 2/9/95.
It was covered on TV channel 4 and a topic of radio talk shows.
I'm actually surprised that others haven't reported it on the net.

Also, about 2 weeks ago I saw 2 black helicopters over a
Santa Barbara beach one afternoon. They were flying down the
coast. They had no markings and were black or a very dark green.

It was a calm afternoon in Vegas on January 22nd and my neighbor decided
we were going to go and try out some of his new hand guns he had gotten
for x-mas so we loaded the truck and set off for a safe place to go
shoot. We ended up about 10 miles outside of Beatty Nevada.
unfortunately we had trouble with the guns and had to pack up early.
we got done getting everything loaded into the truck for the trip back
and were just doing some star gazing when we noticed 4 flashing lights in
the sky right below Orions belt as they moved they stayed perfectly in
line,the lights would blink one after the other,red,white,green,and blue.
we had watched jets from the base do maneuvers over the desert all
evening and these lights were traveling much faster then any jet we had
seen in the sky that night or any night for that matter.(might I add that

my neighbor had previously worked for the Air Force for many years
working on all of thier top jets,F16,SR22 etc).he stated that he had not
seen any of our planes move at the speed these lights were
going, up, down, left, right, and just at a hover in the sky.
we watched for what seemed to be 45 min or so and the lights went behind
the mountain,as the rose above the mountain crest about 20 min later they
flashed a bright array of thier colored lights and then faster than
anything we had ever seen they shot off into the sky and disappeared so
quickly if you were'nt looking you would have never seen.
we got the chills so we left.
the next day my neighbor told me that the time we had thought we got back
in to town and the actual time we arrived were hours apart, his watch
which had just been fitted with a new 5 year battery was hours ahead of
actual time, somewhere we had lost about 2 and a half hours, his watch was
going and still is going ga ga.
We have yet to go back to the sight and look for more speeding lights but
since the incident he and i have had re-occuring dreams about lights and
objects, some of our dreams have even been exactly the same or close to.
if anyone would like to come out for our next road trip to the mountains
you are welcome.
some say this is hard to believe but when truth is kept from so many for
so long the only thing relevant is disbelief....those that do accept the
almost unacceptable are the awoken ones those that refuse to believe are
the blind.
watch out for the truth for sometimes its bite is venomous.

Hi all,

Here's something we saw while driving through town.

Night was clear, sky not very dark because Lebanon is a small city. It
was difficult to see, due to glaring lights. We drove to a semi-dark
parking lot to get a better view. It was flying very slowly, I'd say
about 15 MPH, and wasn't a shape of a plane. It was possibly boomerang
shaped. Many lights on it (more so than your average commuter plane),
of a variety of colors. It was low-flying, less than 3,000 feet up,
I'd say, and it didn't make a sound. I wanted to follow it, but my
passenger was spooked (his first UFO, and he's a born skeptic), so we
didn't. An interesting note is that the flight pattern brought it very
close to our little regional airport. I did not follow up on this

sighting (did not call the airport tower, did not check the local paper
the next morning for confirmation of the sighting).

-Kim

Read in the newspaper last night about an incident in China a short while ago where about 3km of trees were chopped down to a height of 1.5-4 meters by what eyewitnesses discribed as "a train flying through the air". However, their vision was obscured by two very bright lights.

Is this a hoax? If not, any idea what it might have been?

Matt

Reported in the Hinckley Herald, UK Thursday February 9th,1995.
(Thanks Charlie)

UFOs seen hovering near Hinckley railway station.

Late night shoppers at Hinckley`s Food Giant supermarket have sparked an investigation after reporting sightings of unidentified flying objects hovering around the adjacent railway station on Thursday night.

Several people were reported seeing a glowing ball of light just a few feet from the ground over the nearby railway lines.

The object was said to be making buzzing sounds and throwing smaller luminous balls of light into the sky for at least five minutes.

However, investigators from the Leicestershire UFO study project who are probing the claims, have so far drawn a blank.

Their spokesman said "We have no idea what this phenomenon may have been. It disappeared suddenly and left no traces. The guess is that it may have been some form of rare electrical manifestation."

He added "We believe that other people must have seen the glow, who

have not yet reported their sighting. We would very much like to hear from them."

Anybody who spotted Hinckley`s suspected space visitor should call the project supervisor on Hinckley 614013, after 4pm.

All information will be treated as confidential.

About a few days ago, I exited my lovely home through the backyard and this
was around 7pm or so. It was a normal day, I had just finished school a few hours earlier and phad planned to enjoy a relaxed evening in the company of friends. As I walked out towards my car, I noticed a somewhat bright white light just above a few houses out in the distance. At first I thought it was an airplane and waited for it to fly by or perhaps over my house. I am a very big fan of aircraft, and therefore watching aircraft fly-by was something I always enjoy doing. Anyways as this "UFO" became closer and closer, and let me just give you an idea of where it was comming from. My backyard is facing south (exactly), towards Lake Ontario. The craft was heading in a north/north/west direction. As it came closer to my house, I just stood there and observed this strange white light. As we all know aircraft have beacon lights and this strange craft did not. I still had no idea what this strange craft was. It seemed like a regular airplane, but there were no distinct beacon lights and as it got closer, no sounds were heard. As it continued its north/north/west flight path, it suddenly changed course and it was now flying in a north/west direction, straight towards my house. I thought that this was great, a chance to see an airplane fly over my house. Its nothing special but its always something nice to see. As the craft got closer and

closer, I noticed that it was flying much too slow to be an aircraft. And it was really REALLY low. If I'm not mistaken according to Air Regulations, and aircraft must maintain an altitude of 1000 feet above the tallest structure in the area, or something of that sort. Well this strange craft must of been at at least 500 feet, perhaps even lower. It seemed so close when it flew DIRECTLY over me. The strange thing that I find it difficult to explain is the way its shape appear to be in the dark sky and the way the lights suddenly became brighter and then returned to their normal brightness. Allow me to explain. The craft appeared to be somewhat triangular in shape. The reason I say this is because there were other smaller lights in the outer regions of the craft giving it the shape mentioned. And right when the craft "hovered" very slowly above me, its two large ligths became really bright and two columns of light brightned up my whole backyard including myself... I found this very strange... I'm somewhat confused, even today as to the true origin of this craft. Was it really a UFO? I myself beleive it to be such, because how low it was, how slow it was flying and the light configuration. No aircraft I have EVER seen has a light configuration such as that one. Let me try to show you what the craft looked like from the bottom. I must warn you that I am not much of an artist...

The smaller o's represent the smaller lights that I mentioned covered the
outer region of the craft. The two large O's represent the two large lights I spoke of. Those two large lights were at first turned off, but when the craft was directly over my house, they were turned on and they were quite bright. Much like the type of lights you would find at a baseball stadium but they were round. So these two lights were turned on for about a few seconds or so, and I could see these two columns of light shining down on my kneighbours houses as it flew over me. The lights were then turned off and the craft continued its north/west heading. To this day I still donot know what this craft was. I know what I saw and I would like to perhaps undergo hypnosis. I fear that I might have been abducted,but it did not appear to me at the time that I had lost any time. From what I've read about Abduction cases, victims recall time lapses when an abduction takes place. I did not noticed this or even suspect it. Is there anyone out there who could perhaps explain to me what it was that I saw and if there is a slight possibility of an abduction? This message is not a fabrication of my imagination. I know what I saw and I am telling the truth. If there is anyone out there, perhaps a UFO expert in the toronto area that would be willing to speak to me about this incident, I would deeply apreciate his/her remarks and perhaps a number where he/she can be reached. If you plan on replying to this message, please do so privatly. I am not yet familiar with the internet and searching for a message directed to me in public mail, might be somewhat of a disaster. Thank you for your time in reading my message, if in fact you did and I hope that someone out there knows what I'm talking about and clears up some of the doubts that I have.

Thank-you...

Daniel Silva...

This summer on Labor Day weekend in West Spfld Mass. My wife and myself saw what appeared to be a green fireball. We observed it for approx. 6-7 seconds before it disappeared over the horison. I checked with the local science museum and the astronomer in charge of the planetarium said she saw it to. However she said she would check with Boston Observatory and they told her nothing was reported to them. How odd us three were the only ones that saw it and reported it.

Not sure you would really call it a UFO but here is an attempt to describe what I saw.

My location - proceeding easterly on Smyth Road in Ottawa, Ontario at Vincent Massey Public School.

The time was between 0120 and 0125 EST.

The "object" appeared approximately 30 degrees to my left.
It was descending to my left at approx. a 40 degree angle.
It appeared to be getting closer.

It was very bright and very white compared to other shooting stars I have seen.

It appeared to be burning very vigorously with lots of "sparks" flying off.
It seemed to fizzel out just before it would have disappeared from view.

Have some difficulty describing the size; possibly the center portion and the area of dense sparks surrounded it might have been close to the size of a dime at arms length. It trailed sparks slightly possible 3 diameters.

It was moving at a high velocity.

The distance and speed being difficult to estimate; it left the impression of being very close, such that it may have landed in Gatineau. This would suggest that the speed would exceed that of aircraft.

I would estimate I followed its path for 2-3 seconds.
The dominant impression was of its whiteness and brightness.

Hope this might be of some interest and acceptable to post here.

Morley

>From the Fairfield Daily Reporter, February 15, 1995:

Mystery UFO: Citizens stand by story of unidentified flying object

by Charlie Goodyear

FAIRFIELD, CA -- Some people just have to believe.

Following reports in January of an unidentified flying object, officials at Travis Air Force Base declared it a case of mistaken identity, saying the object was actually a blimp advertising tax services. (That sounds logical...?!)

But not everyone is convinced.

All of the people contacted for this article were adamant that what they saw on two January nights was definitely not a blimp, and not easily explained.

"I'm not a believer in UFOs. I never had been. But what I saw made me think twice," said one Fairfield woman who swears she and her two teenage daughters experienced a close encounter.

"I was driving home from Benicia on Jan. 20 around 7:30 p.m. after dropping off a friend, and as I headed east on Interstate 680 I noticed something all lit up," she said. "I took the Rio Vista turnoff and noticed it again near the Budweiser plant. At that point I got a little freaked out."

Driving home through Suisun City, she saw the object again near Railroad Avenue and Sunset Boulevard. And when she pulled into the driveway of her home off Travis Street, the object, brilliantly let, was floating above the neighborhood.

"At this point I'm talking to myself. I said 'This is something the girls need to see' and I went inside to get my daughters," she said.

The woman's two daughters, 15 and 17, were inside the home. The 15-year-old had thought she heard a shot around the time her mother pulled into the driveway. The teen called 911.

"I had heard a boom and thought it was a gunshot. But my sister had her earphones on and thought it was something else. When my mother came in, I went outside with her and there it was with two bright lights, like headlights on a car," she said.

Mother and daughter followed the object back over to a clearing near Railroad Avenue.

It didn't make a sound. We rolled down the windows and we didn't hear anything like a plane or a helicopter. And it moved too swiftly for it to be a blimp," the younger daughter said.

When the two returned to the house, the 17-year-old daughter noticed the object following them back.

"I screamed. It looked like it was coming right at us. It was so low and it turned sharply. It was really scary to me," she said.

Two 19-year-old ROTC students had a similar encounter just a few days earlier on Jan. 16.

"We were coming back from Lucky's on East Wigeon Way and we spotted it out near Lawler Ranch and Grizzly Island. We both got a little scared. It seemed like it was following us.

"What convinced me it wasn't a blimp is that it moved too agile, too swiftly," one student said.

The teens were significantly impressed and made a drawing of the object and told their ROTC instructor, Col. Daryl Nelson.

Nelson, however, was skeptical and remains so. (Surprise!)

"I wouldn't put any credence in what they're saying," he said. "I'm sure they
                ^^^
believe what they're saying. But kids at this age get excited by these sort of things. And there was no physical evidence to support their claim."

Still all of the observers insist they know what they saw.

"I'm going to keep a camera in my car and keep an eye out when I pass by Grizzly Island, especially at night," the woman added.

(Hopefully many people in this area will start carrying a camera in their car, loaded with ISO 1600 film! The paper has a drawing of a long teardrop-shaped object with a bright light on the top and what appears to be a beam shining at an angle below the object.)

(I know someone else who was followed home by a brightly lit UFO a year earlier. She was extremely frightened. I have also seen several UFOs in this area, one of which I described earlier in an interview entitled "Travis AFB UFO Sighting. The UFOs definitely exist and they are not blimps! More likely, IMO, at least some of the UFOs were built for the Air Force and are being stored and tested near Travis AFB. Perhaps others UFOs are observing these new anti-gravity craft piloted by humans. The fact that the UFOs are not particularly stealthy suggests to me that the government is preparing us for the existence of this exciting, revolutionary technology! -- David)

I don't get Alt.ufo.reports. Could you post this for me? It's my
first :)

Source.............: Witness
Date...............: 3-7-95
Time...............: 1930 hours
Location...........: Lynchburg, Va (Facing North @
                      intersection of Graves Mill & 221)
Hynek_Classification: Night light
Witnesses..........: 2
Object_Sighted.....: 1 (brightest light in sky)
Sound..............: none
Duration...........: 4 seconds

During break on 2nd shift at the factory where she works, Kim was outside with another employee haveing a cigarette. The two were facing opposite directions looking at the stars. As Kim turned to face the same direction as her friend, both noticed a light in the sky to the north (the direction her friend was facing). Light (white) was described as the brightest object in the sky (described as a bright star, but much closed), although neither saw it appear even though the other employee was facing that direction. . Distance was estimated at between 5-20 miles. Light was 30 (approx) degrees above horizon and fell in a straight line, at a 60 (approx)

degree angle, to the ground. Light disapeared before crossing below tree line. Total duration of sighting was approx. 4 seconds. Direction and duration confirmed by both witnesses.

Flight traffic is routed to the south of the building (witnesses observe flights every night during their breaks in the same area, south of the building). Confirmed through ATC, final and short are to the south, Inbound traffic from the north is routed over the city. Sighting was outside of city limits in direction opposite from flight patterns.

No trail or debris was observed, nor was sound.

Note: I drew a parabloic arc for her thinking it may hav been a firework shot off. She stated again that the line of motion was almost straight but at an angle of about 60 degrees. I fly in the area and know the traffic patterns myself. The training grounds are to the south behind a set of mountains as well.

Hello everyone. The following event happened flying into Salt Lake City on Delta Airlines flight 1485 on Feb. 20 1995. I had meant to post this sooner, but I didn't get around to it.

I want to premise my story by stating that what I saw was a UFO in the strictest sense (An Unidentified Flying Object). In other words, I have no fricking clue what it was that I saw. I am hoping that someone can shed some light on this for me, or that I may perhaps get a verification of this by others who were in the right place at the right time in Salt Lake City.

I was flying from Omaha, NE to San Francisco, CA. Flight 1485 was the first leg of this flight, with a layover in Salt Lake City, UT. Flight 1485 arrives in Salt Lake at 8:45 p.m. So the time of this sighting was approximately 8:45 PM, Feb. 20. 1995. The location was within 2-7 miles of Salt Lake City airport (I don't know from which direction we made our final descent, although I suspect it was either from the North or East).

Here is what happened:

I was sitting in a window seat on the right side of the plane, towards the front (Looking out West or North upon descent?), so I had an unobstructed view of the ground during our final descent.

As we descended, I was looking out the window at the city. We were flying over a mostly residential area. The view was very clear, and it was dark. I am uncertain of our altitude at this time, but I could clearly make out houses, streets, cars, etc..

What appeared to be a low flying plane caught my attention and I followed it's movements. I noticed that this craft was extremely low, and decided it must be a helicopter because I could not see an airport in the direction it was heading (opposite the heading of the 727 I was in) and small planes do not fly several hundred feet above residential neighborhoods (an estimate) unless they are landing.

The craft had a series of white lights in front, not blinking. So far, so good - nothing odd at all, a helicopter or small plane with lights in front flying low over residential areas. NOTE: most of this is in hindsight; At the time, I simply considered the thing a helicopter and followed it with my eyes.

As I continued to watch, I noticed several VERY strange things.

FIRST: This thing was probably more like 20-50 feet above the
treeline of the residential area(S) that it was flying over - I
thought it was higher because of it's parallax motion (difference in
motion between something nearer to you and something farther) and
my guessed speed of the 'helicopter', which brings me to SECOND:
This thing was flying fast! - not unreasonably so, but probably in
the 150-300 mph range (remember, this thing was flying low). But the
most disturbing thing was THIRD: It passed over a lighted street
intersection (I could see no cars on the streets in this area)
and I had my first glimpse of it's silhouette - it was perfectly round.

I had perhaps a second (or a close fraction, thereof) of a view of
the craft flying over this lighted intersection, but it was ample
time for the shape of the craft to register without doubt in my mind.

At this point, I felt slightly panicky (up until I saw it's shape,
I was simply assuming that this thing was a helicopter).
I probably looked a bit odd, as I snapped my head at the window and
exclaimed (perhaps a bit loudly) "What the fuck?"

I continued to watch the craft (now almost obsessed with it, with
my face pushed against the window), but the plane I was on was
getting lower and the craft was getting farther away
(continuing in a linear direction, very low and rather rapidly).
Eventually, my view became obstructed by the wing of the 727 and
my sighting ended.

If I hadn't seen this thing's shape, I would have never given it a
second thought. As it stands, I know beyond a reasonable doubt that
this thing had a circular silhouette.

In retrospect, I find it interesting that it was flying so low -
definitely too low for it to be picked up on radar.

Can anyone shed some light on this for me?

                                                -- Dan

Hello All,

>From "Australian UFO Bulletin" by VUFORS, PO Box 43, Moorabbin, Vic 3189

Crop Circles Reach Romania by C. James
==========

Two crop circles appeared in Arad, a regional town near the
Romanian/Hungarian border on June 20th. Both circes measured
6 metres in diameter, with an outer ring measured 4 metres in
width. All the corn within the circle was firmly pressed down
in an anticlockwise direction, and the crop was interwoven,
or plaited.

What makes the crop circles different, is that they were
witnessed being made - and not by hoaxers.

There were severeal witnesses, who described a strange
light over the field, and a whistling noise, although there
was no wind. The corn started rippling and then bent over
double.

One witness, Traian Crisan, a 48 year old sheep farmer
was checking his sheep at approximately 4.am, when he saw a

large light approaching - which he described as "like the moon, but much larger". When the light came within 5 metres, a sudden powerful blast of wind blew away his hat and cape and knocked him to the ground, where he lay clinging to a bush. Traian described the object as completely round, which emitted a whistling noise. The object remained motionless above the wheat for two minutes before taking off straight upwards.

The weekend for February 19th I was visiting relatives in Manitowac county, Wisconsin when by brother pointed out a series of articles in the Herald Times Reporter about early morning sightings of balloons over Lake Michigan. This seemed odd to me because no balloonist in their right mind would put up a balloon on the west side of Lake Michigan with February's easterly winds.

The paper reported the Coast Guard as saying the objects were "balloons of unknown origin as balloonist are not required to report..." These had been sighted repeatedly over the course of a couple of weeks.

I was wondering if late january/early feb. had many reportings in the lake michigan area.

Just a brief report... Actualy this is the first time I saw something I
can't quite explain.

Where: State Hwy 9 in Iowa traveling west, about 5 miles east of Rt63
My position. I was driving in my car with the window completely down.
Time: about 1:30pm
WX: abt 63degrees. Light breeze out of west. Mostly Sunny, a few cumulus
clouds but not many.
Date 3/16/95
Other Aircraft: 3 or 4 high flying jets. 12 to 15 jet trails in sky.
What I saw: Looking at a jet, just before entering a clowd bank, flying
west to east, I noticed a bright (reflective) object about 2 degrees
ahead of the jet. It seemed elongated and rotating. The reflection
varied with a cycle of about .75 seconds. Its length seemed to be about
twice that of the jet. Using the jet and the neadby clowd as references,
it seemed to be ahead and below the jet. It was traveling almost due
south, much faster than the jet. The object left no exhaust trail. I
saw it for about 5 seconds before it went into the cloud. checked my
glasses to be sure it wasn't a reflection. It wasn't. There were no
trees in the area and the onjy birds birds around were pheasants feeding
on the ground.

I would appreciate e-mail speculation. I am most certainly not a
crack-pot, actualy I am a UFO skeptic (not unbeliever).

Thanks Ken L. KA9RVK

Hi everyone,

This is first time I am posting to this group, so forgive me if I'm doing anything wrong.

I've just seen a news report about a UFO report in Ballymena, made by a farming family. This is the first sighting I have ever heard of here in the North, only previously hearing about USA/UK sightings on mainstream TV documentary shows. As the reporter pointed out, the area is a level-headed farming community which makes the report all the more interesting.

The woman said that her son came into the living room and called them outside to see the UFO. After some effort the son managed to get his father and mother to come oustide to the back yard. A floating object about 40foot wide emitting light, and with what the woman described as arms with extra lights which as she put it 'appeared to breath' and spin around was hovering above their yard. The object then zoomed away at high speed. Since the story was run in the local paper 'The Ballymena News' 16 more people have contacted the reporter with sightings. No sound was given off by the hovering object.

I have to say, the whole story however incredible does appear to come from a 'normal' country family. I do feel that 'something' must have occured.... but what was it....?

Any more info. on this sighting on the 'net? Any thoughts/ideas for a scientific reason to explain what the family saw.

Thanks for your time,

Roger

What follows is a short transcript of a UK Radio 1 Nicky Campbell show, transmitted on Monday 21st March 1995. I unfortunately missed most of the interview so I would ask anyone who may have listened in to upload any information they remember to this group.

[Key] NC = Nicky Campbell (Radio show host)
          GS = Graham Shepard (Former British Airways pilot)

NC "Back now to British Airways pilots & UFOs. Graham Shepard former British Airways pilot talking to me this afternoon. Its been really interesting hearing about these encounters with UFOs. There have been others, you've been involved in another, briefly what happened."

GS "Yes we were returning from Gibraltar in the evening March 1967, and right ahead of us we sighted a brilliant light which was double the - triple the magnitude of Sirius at its best, and we tried to identify it on the star chart. While we were doing so the light started moving across the sky ahead of us and was changing colour, blues & greens & reds, very iridescent colours & then started airobatting in the sky at phenomenal speeds."

NC "Airobatting?"

GS "Figures of eight, it was just zipping around in the sky. It was flying figures of eight & loops. Accelerations that were quite beyond humans."

NC "It came from the planet show-off."

GS "It was putting on a show, it really was & then from nowhere another one joined it. There were two of them. They went on doing this for about five minutes, drifting away out over the bay of Biscay & it was a brilliantly clear night so there was no mistaking."

NC "Confirmed by radar?"

GS "We asked Bordeaux radar, military radar at that time if they had any traffic and they confirmed they had traffic ten miles to the west of us which by that time is exactly where they were."

NC "And of course you have to make application to be able to do that don't you, official application to notify the aviation authorities that we are going to be ten miles to the west of this British European airways aircraft. It all has to be done through official channels."

GS "Of course."

NC "There was one in Manchester recently wasn`t there. There was another

incident, you wern`t involved but you know all about it. Very quickly what happened there."

GS "Yes this was a very close approach by a UFO and January 6th it was a 737 returning to Manchester and the crew reported it, they actually went into official print. So this now is in the public domain, not only the investigation but the conclusions of that investigation by the Joint Amiss Working group will have to be made public. My main concern is the safety aspect & quite honestly I think it should be a public concern at the safety aspect of these close approaches has never ever been addressed. Its the instinctive reactions of the pilots who have no briefing, no background, no information. I have collected a number of reports now totalling ten very good reports of evasive action being taken by pilots with injuries being caused to passengers and to cabin crew & aeroplanes having to land at midpoint because they have taken evasive action with a close approach of a UFO."

NC "So maybe the cover up or the semi cover up by the airlines is not helpful at all."

GS "Its not helpful and I think there should be a mature and informed discussion about the whole thing and the safety implications of pilot reaction to a close approach of these things.

I apologise for any misspelt words, locations, organisation names. If any are recognised by any of you out there perhaps you will upload an amendment to this group.

Dave....

Subject: UK Police UFO report.
Lines: 37

A few days ago a UK Police Officer told me of an incident which occurred to him and a colleague of his in 1988.

At this time he was working in Gloucester. It was 3 a.m. and they had just finished their refreshment break when the call came in.

A woman living in the countryside had got out of bed to feed her baby. It was quite normal for her to sit in the bay window of the house looking out while the baby fed.

She saw a light come down from the sky and skim across the tops of some trees befor dissapearing in a flash of light.

She called the Police and subsequently the Officer and his colleague attended. They were skeptical but as they drove along the country road towards the house they saw that the road was littered with branches, twigs and leaves. It was as if something had knocked the tops off the trees.

They searched the area as best as they could but found nothing. A report was made to a local RAF base who said that there had been no aircraft flying in that vicinity and nothing on radar at that time. They would send a helicopter during daylight hours to investigate. The Officers were not informed of the result by the RAF.

A meteorite was suggested by others but there was one thing that turned this upside down. The object had travelled horizontally for some distance skimming the tops of trees thereby causing the debris on the road befor dissapearing.

Subject: UK UFO Hinckley, Leicester.
Lines: 76

UK sighting/abductions.

I post this article as I remember seeing a report posted here a few weeks ago of a seperate
incident but in the same area of Hinckley, Leicester.

The initial report consisted of shoppers seeing a small but brightly lit light hovering over
some railway tracks. Notes posted here suggested that it could have been some sort of
electrical ball lightning.

Report Two: Taken from the March/April 95 issue of UFO Magazine.

On a clear moonlit night last October, a family of four were travelling on the M69 motorway between Coventry and Leicester in the East Midlands, to join up with the M1 motorway to visit relatives further North in Nottingham.

As his wife and two children were dozing `Steve` suddenly noticed an odd illuminated ball of mist-like qualities, the size of a transit van, suddenly "shoot over" the top of his car from right to left.

It then flew back in the opposite direction, and was seen shortly afterwards to hover over a nearby electricity pylon.

With his wife now awake Steve`s curiosity was such, that he pulled the vehicle onto the hard shoulder and switched on his hazard warning lights - just in time to see that the `mist` had now turned into a hazy blue cloud.

As he got out of the car to get a better view, the `cloud` appeared to frequently brighten and dim, moving up and down close to the pylon as it did so.

Steve began to think that the cloud was somehow intelligently controlled because as it moved towards the pylon, it would manouvre to avoid actual contact with it.

His conviction was suddenly reinforced when a bright white light came on at the edge of the object, and other lights flickered into life, forming a 100ft circle effect which amazingly began to spin.

Within the glowing mist, other lights came on, and these formed a smaller 40ft wide ring.

As all the lights became much brighter, a saucer shape could clearly be seen. Steve said "It was beautiful and quite silent."

The only noise heard was when the object "whooshed" over his vehicle, just 50ft above him, travelling at a phenominal speed. Steve`s wife witnessed the entire incident, but by now, one of their children had woken up and was crying. "Make it go away daddy, I`m frightened, I`m frightened."

Because of this Steve reluctantly got back into his car and drove off, but was unnerved to see that the object appeaeared to be pacing his vehicle. He increased speed to 80 mph, but it made no difference.

He pulled off the motorway at the Hinckley roundabout, and steered onto some waste ground, but the object was still there, and like them, stationary.

Finally, and with his family panic-stricken, he drove back onto the motorway, and this time, the skies were empty and clear of the mystery object.

Later, both Steve and his wife agreed to recount their experiences under hypnotic regression, and both recalled an abduction experience.

Just thought I'd share the news that 3 ships were sighted last night here in South Africa in a province called the Orange Free State. This is a conservative mainly right-wing part of the land where people are traditionally very fundamental Christian! Apparently the ships were noticed due to there being the presence of a very strong white light which lit up the area around, followed by the the ships changing colours, red to green to purple said one witness; red to yellow to crimson said another.

Coincidentally (?!) we have a French UFOlogist here at the same time who reported sighting similar ships to these earler in the same day about 700 kms away!

Anyone got any ideas as to who/what these were. Where they might come from etc.?

THis is one time I am VERY glad to have access to the i-net. Please comment direct to my p-mail rather than posting because my acess is very limited.

Regards,
Charmaine
Cape Town.

Wytheville, Va. "UFO" aerial ballet:

In which we watch the next "UFO sighting" report being born.
By Dick Farley

Two days ago along Interstate 81 near Wytheville, Virginia, motorists reportedly were lined up along the highway watching two large silver balls perform aerial maneuvers in the sky. Honest!

One witness reported that when the spheres would dive down toward the highway, the many onlookers would scatter and run.

Several of the witnesses had video cameras and were taping the aerial display, which reportedly occurred in daylight. (?) But one witness... (who is a friend of one of "our" guys) ...noted that two of the video taping set-ups were mounted on tripods.

What a coincidence. How prepared those lucky "eyewitnesses" were!

The obvious suggestion was of a staged "UFO" sighting, to create the next news hook for evolving UFO hoaxes, some of which are demonstrably "covers" for exotic reconnaissance aircraft of U.S. and perhaps other governments and military branches. Others allegedly are more sinister kinds of events, staged by powerful international cults intent on destabilizing cultural and religious underpinnings of American society, so as to seize Post-Cold War high ground in the global political power game.

The decades-long UFO quest has been fronted by various so-called flying saucer investigation organizations, most of which appeared with full complements of governmental or military related personnel claiming some "previous access to secret documents and photos." These groups typically have spun out various UFO stories, which other similarly well-orchestrated folks' "debunking efforts" then deflate, amid ridicule and derision for innocent believers who get caught up in the game. Then it all cycles again. And again. And again.

Many of the so-called UFO investigation organizations, and leading-light personalities in the self-styled pseudo-science called "UFOlogy," in recent years have been claiming the UFOs carry alien visitors to Earth, bringing a new planetary agenda.

Many of these terrestrial advocates for our visiting "ETs", including a Harvard psychiatric faculty member who reportedly is now under fire from a faculty committee at that venerable establishment university, hail the invading "aliens" as friends come to "transform Earth to a new, higher plane of being." More cynical interpreters read the same signs as, "They are here to kill a lot of us, then possess the bodies of those who survive!"

Obviously the happier assessment picks up the most followers.

Others claiming scholarship in the field suggest that most so-called UFO proponents are suffering a kind of collective psychosis, which some neuroscientists (including one who held a senior post in the U. S. Central Intelligence Agency) fear is a subtle pandemic sweeping

across the planet, raising up cults and cultists to new fever pitches of apocalyptic millenialism.

The most interesting and internally consistent of approaches according to serious students of the field in all of its seeming manifestations, is one which describes the source phenomena termed UFOs as more akin to long-standing reports of psi infestations of human minds by non-human intelligences (NHI).

These hypothesized NHIs have operated throughout human history in a variety of semantic camouflages, depending on the cultural contexts and scientific philosophies by which various host cultures defined themselves, with respect to their physical and psychological landscapes. Our own materialist, Newtonian-clockwork historical view of our physical and mental environments has apparently left Western society vulnerable to this type of infestation, as if to a new pathogen for which there are neither identifiable acknowledgments nor antibiotics. A lot of us are getting sick.

Faeries, leprechauns, angels, demons, ghosts and alien visitors all may inhabit similar interstitial spaces in human perceptual gaps, perhaps engendered by physical limitations of our anthropocentric sensate foci. Many cultures had folkloric contexts and "cures." Ours, which doesn't see them, does not.

Formerly called demonic possession, and still described as such in the Roman Catholic Church and in many other cultures worldwide today, this paradigm has drawn modern descriptors for the phenomenon from its American researchers. These include clinical depossession, as it is termed by practitioners such as Dr. Edith Fiore, psychiatrist Dr. Raymond Moody and other pioneers of this research, and Spirit Releasement Therapy, as trademarked by Florida-based therapist Dr. William Baldwin.

Dr. Baldwin, a retired dentist who is becoming noteworthy as a psychologal counselor and hypnotherapist, said he also has encountered "ET" presences in some of his clients. And some of these clients, Dr. Baldwin reports, have attained varying degrees of "relief" from a range of subtle apparent perceptual manipulations by these purported non-human intelligences, which the therapist hypnotically employing regression therapy found nested in his clients' spiritual bodies, seemingly causing their hosts to suffer from psychological or spiritual dysfunctions and physical ailments.

In other words, these "things" live where we can't see them, and quantum physicists have recently joined theologians and aboriginal shamans in telling us scientific materialists how arrogant we are to believe that: because we can't see them, this means they aren't there. They are, and always were. Whatever they actually may turn out to be.

Electricity, bacteria, viruses and even x-rays and ionizing radioactive emissions come to mind as "things that weren't there," but which had measurable effects on human existence. Heck, less than

150 years ago a physician was expelled from his own medical community for having the gall to suggest that, if physicians would wash their hands before moving from pregnant woman to pregnant woman during pelvic examinations, then the high rate of fatal infections of mothers and fetuses might be lowered. "Germs...bah, humbug." The "establishment doctors" didn't buy into the theories of Pasteur and Lister. Women died.

Understandable it is then, why psychiatrists and many, many psychologists are all rushing to find some paradigm in which these mental infestations or infections can be treated by their respective approaches. What with health care managers demanding definitive diagnoses and pre-adopted reimbursement levels, if psychoses of alien abductions turned out to be some kind of a "bug," then the counselors would lose a major market share to the drug pushers (read that neuro-pharmacologists), while the market for incense and imported idols of the Buddha and the Hindu pantheon of old gods would dry up, leaving aging hippies again without employment. Who will buy all their drums and rattles?

Scoundrels among the psychological journalism community, and not a few historians, have pointed out that our coming Millenium is exclusively an artifact of our dominance by a European-American Gregorian calendar, imposed in 1582 A.D. by a long-dead Roman Catholic pope. The Chinese, Japanese, Hebrew, Maori and Lakota, Hopi, Apache and nearly every other human tribal culture have all been collectively head-scratching and wondering (when they are not laughing politely behind their own hands) what on Earth is wrong with the faith of these folks who measure time from the birth, death and resurrection of Jesus (Yeshua), whom they claim as their Saviour?

Proclaimed by these same Euro-Christian folks as the Son of God come to Earth...who ran afoul of the local Judaic elite, was crucified by their Roman governers and died on their cross, this Jesus is said to have transcended his fatal end in order to liberate his followers from just these kinds of cults and magical mystery manipulations of the old shamanistic traditions which are now rising again into social prominence. Increasingly with fatal consequences for believers and society.

While many of the contemporary followers of Jesus and his teachings apparently are in almost complete panic from their onrushing awareness that perhaps what he predicted long ago is really coming true, the rest of our predominantly materialistic and despotic consumerized society is swilling psychotropic drugs like Prozac, while still others create and worship new gods, dig up old gods and sink into computerized realities of their own creation. The really confused go shopping, and commit pizza-cholesterol suicides.

Globally, most of the world's peoples believe Americans and their Euro-Allies need to "relax," now that their Cold War has been replaced by a less organized chaos stemming from wanton nuclear and oil profiteering: despotic barbarism by a handfull of multinational corporations and their powerful bankers. Not a new phenomenon in the

aftermath of war and lengthy warlike footings, but it's the first time those living today have seen it.

Simply changing the U.S. calendric system would take care of the rapidly approaching Millenium...just as changing clocks an hour forward or backward in Spring and Fall handles inconvenient asynchronous behaviors of our Sun...which we here on the Third Rock Out can not change. But there already is such an industry of publishers and panic-television programming, as well as solid upswings in rates of religious payments via bank credit cards and "900" numbers to psychic hot-lines, that American economists and telephone company stockholders are loathe to kill the goose that is laying these golden eggs, feathering their bottom lines.

The most prominent UFO aliens, who seemingly have been doing brisk business abducting sleeping humans (mostly females) and performing gynecological experiments on them, typically implant "planet cleansing" philosophies in the heads of their subjects before turning them loose to deconstruct our society.

Other experiencers, as the "UFOlogically impaired" are euphemistically called by Harvard's eminent "close encounter" psychotherapist Dr. John Mack, claim to have been implanted in their heads and bodies with devices of varying types and purposes.

And New York modern artist Budd Hopkins, an escaped West Virginia Presbyterian who allegedly met God and our "alien" visitors in his travels from Greenwich Village beatnik haunts to the Park Avenue parlors of Gurdjieff cultists among his art patrons, has now claimed that a former senior United Nations official saw one of Hopkins' female "UFO clients" snatched from a 12th-floor Manhattan apartment building into a "craft" hovering in full view of the Brooklyn Bridge. (It's not for sale!)

Detractors have called Hopkins' big story "The Manhattan Transfer case," much to the artist-hypnotist's chagrin, and he has repeatedly delayed publication of his much announced book about the case. Wags have also wondered if Hopkins is waging yet another publishing "drag race" with that mid-1980s "alien visitor experiencer" Whitley Strieber, whose purportedly non-fictional Communion triggered the UFO/alien abduction fever in 1987, just as Hopkins' second book on the phenomenon, Intruders, came off the presses. Strieber's new Breakthrough is eagerly awaited, in hopes he will tell readers of his latest revelations about Earth's ornery time-space brethren.

If the Wytheville, Virginia siting earlier this week is to be the next focal point of the newest UFO wave which will bring out psychics raving to the tabloids and talk shows, you can say that you read it here first. It may all be real. It also may not be what you think it may be.

So: discernment, not debunking!

"ET, phone 'A Current Affair.' And while you're at it, drop down at

Rockefeller Center to pay a visit to your banker."

-=-=-=

and most unusual humming coming from inside the woods.
A heavy rainfall precluded the futher investigation of
phenomenon. The residents state that the occurence began
at 3:45 p.m., but the calls were not placed until 6:45 p.m.
The testimony of the observers states the calls were placed
immediately after the sightings, but a time difference
of three hours exist before any agencies were notified.
Widespread electrical disturbances were reported throughout
the tri-county area. The three hours lost to the
observers remains unaccounted for, but the full invest-
igation is still pending.
                            Doug Gatlin

Inus a friend of mine translated the bit below from an Afrikaans Newspaper. It was not reported in the English papers.

Translation from Die Burger, Cape Town, Friday 31 March 1995, p5
"Vrystaatse vlie"ende piering h'et bakkie laat stol, s^e boer"

Free State Flying Saucer _did_ stall truck, says farmer
Own office: Bloemfontein

A flying saucer as wide as the road and between 6 and 9 m high landed in the road in front of him, according to a Coligny farmer.

"I know people will dismiss it as rubbish and will think I'm crazy, but I definitely did see it. I _had_ to report it to the police", Mr Jan Pienaar (45) said to our Bloemfontein office.

Several people from Bloemfontein alleged that they also saw a UFO yesterday - one even captured it on videotape.

Mr Pienaar was travelling at 7.30am on the road between Coligny and Brakspruit when he encountered the flying saucer.

"It suddenly stood right in front of me in the middle of the road. My truck stalled and when I got out something like a magnetic field prevented me from moving. The UFO was about 90 m from me. It stood on three legs and hummed softly, like an electric motor.

"It was beautiful - metallic like stainless steel, but also in a strange way transparent. It also had red, green and purple lights. The shape was like an upside-down bowl with two ridges on top.

"After about three minutes the legs on which it stood slowly lifted from the ground and folded away. I could see a row of small windows on the top ridge, before it rose as fast as a lightning bolt"

A police spokesman said the Bloemfontein flying squad was notified about 2.20am yesterday of the UFO. Members of the service saw a bright light and a member of the public captured it onn videotape.

According to Mr Matie Hoffmann, physicist and amateur astronomer, it could
be a weather balloon, kite or anything with a sharp light.

04-03-94 - Silverton, OR (about 40 miles southeast of Portland)

KATU TV - Evening News:

   At least fifteen separate individuals sighted a silvery oblong
shaped object with a dome-like top traveling slowly from south
to north during the evening of 04-02-95. No weather balloons
were reported released by either the Salem or Portland airports.
After traveling at a slow rate, the object suddenly accelerated at
a high rate of speed and disappeared. No sounds were associated
with the object.

Sunday night it appeared some unknown piece of metal has fallen in
Suriname. On the news I heared they believed it was a piece of some
rocket, but they were stil examining the marks on it.
I tried to follow the news, but I nowhere heared anything about it.
No paper did mention anything and something like radio silence existed
about this piece of metal.
Does anyone know of this?
Has anyone else heared that piece of metal has fallen?

Rembert.

Hope this helps...

Ä Area: UFO Topics
ÄÄÄ

BS> night they observed an incredible light show for about an hour.
BS> The Baquets were reluctant to talk about the experience and
BS> did so only at the prompting of Mrs. Baquet's husband, Russ, and
BS> employer, Imnaha area rancher Don Hubbard, after Hubbard overheard the
BS> family's account of the event Monday morning.
BS> "Bryan told me not to tell anybody because nobody would
BS> believe us," Mrs. Baquet explained after we caught up with her along
BS> the road to Dug Bar. "But I'm getting old, and I don't care if anybody
BS> believes me. I know what I saw."
BS> At first what they saw looked like a meteor. Only the
BS> streaking light stopped over the middle of the river above their place,
BS> where it hovered for nearly an hour.
BS> Mrs. Baquet described the image as a round circle of white
BS> light with a column of light rising straight up from the center and two
BS> other columns of light extending out of the bottom in a triangular
BS> pattern. In addition, she said, the white ball was emitting bars of
BS> white toward the ground and around the walls of the canyon and red,
BS> blue, and white light from what appeared to be some sort of beacon.
BS> Bryan Baquet said that from a distance the image looked like a
BS> saucer but through binoculars it looked "more round above the lights."
BS> His mother described the magnified appearance of the image "like a
BS> brain ... with veins running over the top of it."
BS> "With the reflection from the lights we couldn't see the
BS> bottom but could see a round dome, just like an outline, above the
BS> lights," Bryan Baquet said. Both Baquets said the image moved from
BS> point to point at lightning speed, including at right angles. They also
BS> said there was no motor noise associated with the lights.
BS> "It would come forward, then back off real fast," she
BS> described. According to separate accounts from both witnesses,
BS> the image darted over a knob on the west side of the Imnaha River
BS> referred to locally as "Crazyman's Point," where it seemed to hover for
BS> another five minutes or so before all signs of light disappeared.
BS> At 11 p.m., the image was gone and Bryan decided to leave for
BS> his house, located about three miles down river at the Corral Creek
BS> Ranch. Mrs. Baquet said she worried that what they had just witnessed
BS> may have been an alien spacecraft and that it might follow Bryan's
BS> headlights. Bryan reported that as he was leaving his mother
BS> said, "If they come back and chase you, shut off your lights and crawl
BS> under the pickup." "It's an eerie feeling," she later described
BS> the incident, "'cause it's like something you have no control over ...
BS> you know what you see but your mind doesn't want to accept it."
BS> At one point, Mrs. Baquet said, she considered going back into
BS> the house and turning off the kerosene lamps but decided that if the
BS> object was an alien craft its occupants were already aware of her
BS> family's presence. She estimated the object was about the size

BS> of a helicopter, and in fact a helicopter crew under contract with the
BS> Oregon Department of Fish and Wildlife has been working in the area
BS> this week, conducting surveys of salmon spawning areas, or redds, in
BS> the Imnaha River. Vic Coggins, ODFW area biologist, said his
BS> crew had gone out in the chopper on Monday morning but had not flown
BS> after dark on Monday. If the object witnessed by the Baquets
BS> was indeed some type of air- craft it is unlikely it would have been
BS> detected by any of the radar systems which cover the region, according
BS> to Andy Plamondon, an air traffic controler at Felts Field in Spokane,
BS> Wash. He said that most control towers have a radar umbrella of
BS> less than 40 miles, so the only place where such an event might show up
BS> is on the radar screens of aircraft who were flying in the area at that
BS> time. The Imnaha area, like much of the Pacific Northwest, has
BS> had its share of alleged encounters with unidentified flying objects
BS> (UFOs) over the years and is not all that unusual, according to various
BS> sources interviewed. "It's a common experience at lookouts, and
BS> I would not be surprised that a couple living out in the sticks would
BS> have that experience," said Tom Bates, a reporter for The Oregonian who
BS> has written about UFOs. "It doesn't surprise me ... it doesn't surprise
BS> me a bit." Bates once worked for the Forest Service at one of its
BS> lookout towers and logged his own eyewitness account of a UFO sighting
BS> on his official logbook. Bates as a reporter for The Oregonian,
BS> subsequently attended a convention of former lookout station guards and
BS> was amazed by the "number of people who testified that they had seen a
BS> number of spectacular obser- vations around the Northwest." It was
BS> striking, he said, to hear these stories in great detail years after
BS> the fact, in some cases, from more than one source.

BS> Hope you enjoyed the story...You're always welcome to call the

I wonder if someone can help me to identify something that me and
another family member saw at 11:43pm on Thursday 13th april over
southern England, in Guildford, Surrey. We live quite high up and have
quite a good view of the town and the surrounding couple of miles.
It was a clear night, visibility was good and we could see quite a long
distance. Out of the window, two of us saw what appeared to be a
bright light in the distance which hovered quite a while and then
appeared to get brighter and came closer. I grabbed a pair of
binoculars and switched off the inside lights and another one of us
watched the light from another room without the aid of bioncoulars.
Both of us watched and saw what appeared to be a bright triangular
light which became bright and quite difficult to watch. After
approximately one minute the light suddenly, and completely, vanished.
We do not think that what we saw was an aircraft or helicopter as we
could not identify any aircraft marker lights, and since we live close
to an aircraft flight path we are pretty good at identifying these type
of things.

Did anyone else see this? Can anyone shed any light as to what this could have been? Are you meant to report these kinds of things? (or am I just seeing things? :-) If anyone has any ideas, could they reply by E-mail, as I do not monitor this newsgroup often.

Many thanks.

Did any one else see the 7 or so UFO's flyingin in a tight V shape pattern, flying from the SE to the NW, around 9:30pm.   They glowed an amber to red glow as if the bottom of the objects were made of reflective metal. There was no noise, no blinking lights, and no other usual characteristics of conventional aircraft flying at night.   Me, my two children and a friend of our witnessed this from the Winnetka Drive-in in the Chatsworth area.
My son heard a few cars honk as if they saw it also.   And my daughter heard other people commenting "What is that?!!"
Just wondering if any one else saw this or can explain it.

My wife & I were camping in the crater of Haleakela Volcano on Maui when we saw what at first to appeared to be an aircraft or helicopter light. After watching it for a few minutes we realized it was behaving in a manner that no aircraft or helicopter is capable of. It followed a series

of left & right-angle angle turns and complete stops, and repeated the same series of movements all night long. Somehow , we actually managed to fall asleep with this light doing its thing.
On our way out of the park we mentioned this episode to the park rangers, and their response was very interesting to us; They said that there have been other reports of lights in the crater at night. No-one has ever been able to explain it, although one of the rumors is of secret government aircraft being tested at night. Another explanation was that what we were seeing was car headlights from lower on the volcano were reflecting of some kind of atmospheric inversion. (whatever) One ranger said she had heard that ufos just happen to like Haleakela.
I am posting this message to ask if anyone else has ever seen lights in Haleakela, or heard about it before?

Nick

I'm a skeptic about UFO's but I saw something last night (Monday, April 17, 1995) that I can't explain. Maybe someone out there can... I was outside in the back yard having my last smoke of the evening (my wife doesn't allow me to smoke in the house) around 10:40 - 10:45 (Guelph, Ontario, Canada, close to Toronto). It was very clear and the stars were magnificant. A few jumbo jets flew over on their approach to Toronto International Airport then there was a lull in the activity. I glanced up toward the West-South-West and noticed a motion of one of the stars. I got pretty excited about this because I thought I was about to be treated to a meteor trail. But the typical streak did not develope, so I figured it was a satellite still catching some of the sun's rays, it was moving pretty quickly and as it approached overhead, I saw that there were actually three equally spaced points of light moving in a slanted line. They moved overhead and towards the North-North-East very rapidly, it took approx. 4 seconds from first siting in the south-west horizon to disappearing in the northeast horizon. So my questions to you are...
1.Can satellites move that quickly?
2.Are there groups of satellites in formation orbiting the earth?
3.Would the satellites be in sunlight at 10:45 pm or in shadow?
4.Is it possible that maybe a meteor broke up or chuncks of ice can skirt very close to the earth, not enter the atmosphere(i.e.not produce trails) and still be seen reflecting sunlight back? (so far this is my best explaination)
5.Did anyone else see this?

I noticed in today's Salem, Oregon "Statesman Journal" the Mutual UFO Network
found that the mass sighting of the Silverton, Oregon UFO recently was due to
a couple of high school kids tying highway flare to a mylar helium balloon.

I have during recent weeks been attempting to document three entirely
separate accounts of an encounter with a UFO.

My sole purpose in attempting to document these accounts is to hopefully
extract as much detail as possible and place each account in the public
domain.

The first summary account is appended herewith and I hope to finalise the
remaining accounts shortly.

This reported encounter occurred just over 20 years ago now and whilst it is
an historical account, it is no less relevant. Indeed, it serves an
important purpose in providing a reference to a craft which at that time
reportedly exhibited characteristics similar to those attributed to
triangular shaped craft in more recent times.

I have summarised this account using only the verbatim testimony of the
witness and have their confirmation that this summary it is an accurate

record of events.

This is for the public record:

[START]
I had a UFO sighting at approximately 9:30 p.m., in September of l974.

I was riding in a car with two other people going down I 5, south from San Francisco.

At about 250 miles north of LA, I saw two huge floodlights on the side of the car. When we passed by the object we could see it very clearly. It was about as wide as three cars and it was much longer.

It had a stingray shape (it was shaped like a stingray fish). It was round in front, it had protrusions on each side (like small wings) and came to a rounded point in the back.

I did see the size of the craft. I think it was about 40 feet long and 30 feet deep, about as high as a two story building.

It was dark and the color was hard to see but I think the color was a metallic grey or black.

It had a blue light on one side and a green light on the other side. It was a long time ago, so I could be wrong, but I think the green light was on the right and the blue light was on the left. The lights were on each side at the farthest point on each side. They were at the end of the "wings" on the sides of the craft.

The floodlights were right on front of the craft, similar to headlights but brighter than daylight and brighter than any light I've ever seen. They were brighter than high intensity mercury vapour lights which are used to light up football fields at night.

They were approximately one fourth to one eighth the size of the front of the craft, similar to the size of headlights on a car.

They were on all the time.

It was hovering above the ground at about three feet. We immediately pulled the car over and got out. There was no wind and absolutely no sound.

Then, it slowly rose up and floated over the two lane freeway and paused very still on the other side before taking off.

I saw the underside of the craft but it was dark so I didn't see details. I do know that I did not see any wheels or landing gear. I was looking specifically for that because I couldn't figure out how the craft was suspended without any moving parts. When I looked to see what was holding it up, I was astonished to find that nothing was holding it up and it was not touching the ground.

There were no lights visible underneath the craft.

When the vehicle went over the freeway, it had been in a stationary position. It paused about 5 seconds and took off at an accelerated rate, which was instantaneous. I mean, it was like going hundreds of miles an hour in one second, with no acceleration time. It travelled straight at about 30 or 40 feet off the ground and then it went up into the sky and disappeared.

The craft made no discernable noise at all, even when it took off.

It had two red lights on the back, they were smaller in comparison to the other lights.

When it took off, it did so at lightning speed and was gone in 3 seconds.

I've never known anyone else who has seen anything like this.

Kathy.
[END]

Cheers,

James.

Heard this on a morning show here in Detroit. The DJs were talking to
a state trooper (I believe). He said the object was 60 ft. in diameter
with lights all around it. The woman who first saw it said it was
hovering at tree-top level for a time then moved farther away. A
trooper arrived on the seen after being called and observed the object
with binoculars. The womans neighbor arrived with a videocam and
recorded the object. The trooper on the radio(who wasn't the one on
the seen) said they were trying to contact the Air Force since three
jets were seen in the area. The total time the object was observed was
20 minutes. The trooper said the tape has been released to the media
and that it was shown last night in Cadillac, Mich. Also, the DJ
specifically asked if this was another Santa Claus sighting stunt.
The trooper said absolutely no.

The next edition of CNI News will appear on Monday, January 9.
==========
1) "CYLINDRICAL MASS" UFO REPORTED BY MICHIGAN STATE POLICE
Reported by Hildebrand Communications, Inc.
for United Press International
December 22, 1994
Kingsley, Michigan, December 21, 1994 (UPI) - A Michigan State Trooper
responding to a woman's UFO report Wednesday confirmed seeing "a
cylindrical mass, with a large amount of individual lights."
     A 5-minute videotape shot by the woman and broadcast on local
television provided additional evidence that something was indeed out
there, police said.
     "This one is apparently a valid report," said one of the trooper's
superiors, State Police Sgt. Bill Sholten. "He is credible. I saw the tape
and there was definitely something out there," Sholten said.
     The trooper, who asked not to be identified because he doesn't want
publicity, reported seeing three military jets in the area while the UFO
was near. His report also noted that after the siting, a request for

information was turned down by the U. S. Air Force for unknown reasons.

A Regional Air Traffic Control Center in Minnesota reported spotting something on radar screens to support the report.

A woman who lives on a farm near Kingsley said she saw the object hovering above her barn at 6:30 am EST, December 21st. She called police about an hour later and the trooper arrived at about 7:45 a.m. The trooper watched the UFO through binoculars until it disappeared about 20 minutes later. The woman, who got a closer look at the UFO, described the object as about three times larger than her barn, or some 60 feet in diameter. She also said it had white and blue lights and what appeared to be a haze surrounding it.

Sholten said the woman told police she saw a similar UFO on Thanksgiving, but didn't tell anyone "because she was afraid everyone would think she was nuts."

[Thanks to Sheldon Wernikoff for these additional details]

WJBK-TV, Detroit's Fox affiliate, reported the incident on the 7:00am news broadcast of December 23, 1994. The following is based on WJBK's story.

Eyewitnesses said they saw "pulsating, hovering lights in the sky" and a "cylindrical mass with a large number of individual lights that appeared to be connected by softer light running between them." The lights remained visible for 90 minutes.

The object was seen early in the morning of Dec. 21 by Tracy Shayda, who said it was hovering over her house. She called her neighbor, who shot a video of the object.

Michigan state trooper Glenn Guldner watched the object for about 20 minutes. He stated, "I really don't know, for sure, what it was. I've been on several 'lights in the skies' complaints, usually ends up being an airplane, Northern lights or something like that, but this is the first time I've actually seen an object in the daylight."

Of Shayda's report, the trooper went on to say, "She thought for sure everyone would think she was nuts. Prior to my getting there, the object was a lot closer. It came to within treetop height of her house."

In October, about fifteen miles northwest of the Kingsley area, two other people saw an object in the sky which they reported to police. Their description was similar to the object sighted in Kingsley.

2) MICHIGAN UFO MIGHT BE JUPITER -- OR MIGHT NOT BE

Based on a story from the Traverse City (Michigan) Record-Eagle of Dec 23, 1994. CNI News thanks Sheldon Wernikoff for this story.

The mysterious object seen in the sky on Wednesday morning, December 21 over Kingsley, Michigan (reported previously in CNI News) could have been a planet, a Northwestern Michigan College astronomy instructor said Thursday.

"If I were forced to bet, I'd bet it was Jupiter," said Dick Cookman, after viewing a videotape of the object. "But it would be a cautious bet."

Kingsley resident Tracey Cejda reported seeing an object Wednesday when she let her dogs out at 6:30 am.

A neighbor, Michael Stelter, caught the image on video. State police Trooper Glenn Guldner arrived at Cejda's house sometime after 7:30 am and observed the image, assisted by binoculars, for 20 minutes.

Cookman, after studying Stelter's video, said there are some aspects to the case that support the Jupiter theory and some aspects that don't.

On Wednesday morning at 6:30 am, Jupiter would have been three degrees above the horizon in the southeastern sky. By 7:30 am, it would have risen to 11-1/2 degrees above the horizon.

That could explain why the object appeared to be at treetop level when Dejda first saw it and why it appeared higher in the sky by the time Guldner arrived.

Also, when planets appear low on the horizon they can appear to change color, to twinkle, and to move, he said. Those effects are caused by light refraction, especially when there is a lot of humidity in the air.

In fact, for the last several decades, reports of UFO sightings rise whenever a planet is low on the horizon, Cookman said.

However, Cookman was surprised at how large the object appeared on the videotape. With an image that large, he would have expected to see some detail that did not appear, such as the bands of the planet and the four of its moons that are visible to the naked eye.

"But that could just be because of a blurred image," Cookman said.

Cedja and Guldner remained convinced Thursday that they had not watched a planet. When Cedja first saw the object, it appeared to be three times as large as her barn.

She said a range of emotions ran through her, including both fright and excitement.

Guldner also said Thursday he was sure it wasn't a planet he saw. Stelter was out of town Thursday and could not be reached for comment.

Guldner noted in his police report that three military-type jets flew past the object and that the lights on the object went out as the jets passed by. He said Thursday afternoon he had not yet tried to identify the jets.

They were not military jets from anywhere in Michigan or from a base in Toledo, Ohio, said Major Jerold Foehl, public affairs officer at Camp Grayling. Foehl checked with those bases Thursday and learned they had no jets in the air Wednesday morning.

Here are transcriptions from the Michigan State Police reports that I obtained via the Freedom of Information Act. There has been a recent rash of sightings in Western and Northwestern Michigan in the past four months. It seems as if something major is transpiring. I called the parties involved in the sightings myself, and I spoke with the Michigan State trooper who also witnessed one of the events. I can honestly say that these people are very credible, and very sure that what they saw was nothing they had ever seen before in their lives. I asked all of them if the sighting could have been planet Venus, or maybe a helicoptor or airplane, and their reaction was definitely very clear - that they witnessed some type of manufactured craft (either made by US government or extraterrestrial beings) that could not possibly be mistaken for a planet or natural phenomena. But you can read the police reports yourself and make your own decision.

Eric

**I WILL NOT GIVE THE NAMES, ADDRESSES, and PHONE NUMBERS OF THE COMPLAINANTS. I WISH TO RESPECT THEIR PRIVACY. CONTACT THE MICHIGAN STATE POLICE IN TRAVERSE CITY AND FILE A FREEDOM OF INFORMATION REQUEST TO OBTAIN THE POLICE REPORTS. EVERYTHING I AM ABOUT TO TYPE BELOW IS TRUE TO THE BEST OF MY KNOWLEDGE.

MICHIGAN DEPARTMENT OF STATE POLICE
ORIGINAL INCIDENT REPORT
October 12, 1994

Time Received 7:00PM
Work Unit - Traverse City Post
County - Grand Traverse
Incident No. 71-3183-94
File Class 9800-7
Incident Status - (5) Closed
Nature of Incident: Reports a suspicious situation, spotted a U.F.O.
INFORMATION:
Complainant called to report that on Monday, Oct. 10, at 8:15pm he and two friends were on their way into Traverse City from Lake Ann area when they spotted a tri-angle shaped object in the sky to the South of them. He said they were on N. Long Lake Rd. in the vicinity of Straight Rd. and the object was off to the Southeast. The driver, (name witheld), age 22 stopped the pickup truck and all three got out to get a closer look. As they got out and watched the object, it sped off from it's hovering position in a lift off angle similar to a helicopter.
Complainant checked with the Traverse City FAA Tower to see if any such plane or balloon was in the area at that time of night, but the man at FAA said he was too busy to talk about such a thing and hung up.
INTERVIEW DRIVER OF VEHICLE:
Undersigned officer talked to (name witheld), who was the driver of the pickup truck that evening, and she related that she wasn't able to get a good look at the object as she was watching the road. She did stop and within moments of them getting out to see it hovering over the corn field it sped off.
The other passenger (name withheld), age 16 wasn't available to comment.
OBJECT IN THE SKY (U.F.O):
The object was described as tri-angle shaped object with the lower or bottom having blue lights emitting from it and shining downward. At the peak of the object it had a red beacon light. The strangest thing that (names withheld) both said about the object was that it lifted off without any roar or sound of any kind.
STATUS: CLOSED

MICHIGAN DEPARTMENT OF STATE POLICE
ORIGINAL INCIDENT REPORT
December 21, 1994
Time Received 7:30AM
Work Unit - Traverse City Post
County - Grand Traverse
Incident No. 071-4044-94
File Class 9900-9
Incident Status - (5) Closed
NATURE OF INCIDENT: Suspicious situation - UFO
LOCATION/TIME: location is above address located in sec. 28 of Paradise Twp., Grand Traverse Co., object was first observed at aprox. 6:30am date.
CONTACT COMPLAINANT:
undersigned met with comp. at the above location and was informed that the object was still visible. Officer went with comp. to her back porch and was pointed out a bright light in the sky, time was approx. 7:45am, clear skies. Upon looking at the light with binoculars, a cylindrical mass, possible gray in color was observed. On the underside of the object a large amount of individual lights were seen that appeared to be connected by a softer light running between them. At this time the officer asked comp. if she had a video camera. It was learned that she had just purchased one, however did not know

how to work it, she advised that she called her neighbor, (name and address witheld) and he had been video tapeing the event.
Undersigned watched the object for approx. 20 minutes before it appeared to get further and further away. Object could still be seen when officer left the area. During this time it was noted that the object did not just stay level it could be observed rotating back and forth and at several times tipped vertically and then back down. Another smaller bright object could be seen just to the east of the larger object, however no shape or color could be seen just a bright light.
INTERVIEW COMP:
it was learned that at approx. 6:30am comp. opened the door to let her dogs out when she first observed something in the sky, as she watched it it appeared to fall straight down to a height of just over the tree tops near her storage barn. When asked about the size she advised that it was approx. 3 times the size of her barn (approx 60 ft. in diameter). She stated that she observed the white and blue lights at this time and there appeared to be a haze around it. Comp. stated that she stuck her head outside and was surprised that she heard no sound coming from the object.
At approx. 7:00am she called her neighbor listed above and requested that he video tape the events. Comp. stated that around Thanksgiving time she observed another event from her home. She stated that the object was further away and higher up than this time, however, she could still make out the lights, she stated that she did not call that time as she was afraid everyone would think she was nuts.
CONTACT (NAME WITHELD):
Undersigned contacted (name witheld) and learned that he had video taped the events. He stated that (name witheld) had called at approx. 7:00am and told him about the object and requested that he tape it. He got up and got dressed, went out on the porch and started taping it. (name witheld) stated that it was well up in the air when he first saw it and started taping. (name witheld) gave undersigned the tape to make copies of, the original to be returned to him.
ADDITIONAL OBSERVATIONS:
It should be noted that at approx. 7:50am three military type aircraft flew through the area, as each aircraft approached the object the lights went off and then back on as the plane passed.
CONTACT MINN. AIR TRAFFIC CONTROL CENTER:
a check was made and learned that during peace time they do not have a man watching the consol at all times. It was learned that the three aircraft described above were picked up on the radar, however, they were transponding signals which helps the radar pick it up. It was learned that on object in the air that was not sending out signals would be hard to be noted.
ADDITIONAL COMP: 71-3183-94 taken 10-12-94 attached
STATUS: closed
SUPPLEMENTAL INCIDENT REPORT:
Incident Number: 071-4044-94
Supplemental Date: 1-10-95
Original Date: 12-21-1994
File Class: 9900-0
INFORMATION: this comp. is re-opened to clear up confusion on the ownership of the video tape.
DISPOSITION of the VIDEO TAPE:
on 12-21-94 undersigned brought the original tape to the post to make a copy for the National UFO Reporting Center. While at the post TV9&10 took

pictures of the tape as it was playing on the VCR. The original tape was taken back to the comp. as per prior arrangements with the owner of the tape.
The copy is being sent to the National UFO Reporting Center in Seattle, Wash.
